

Application No. 10/777,960

**AMENDMENTS TO THE SPECIFICATION:**

Please substitute the following amended paragraph for the pending paragraph [0001] on page 1:

[0001] Illustrated in copending application 10/606,298, U.S. Publication 20050255402, filed June 25, 2003 on "Toner Process", the disclosure of which is totally incorporated herein by reference, is a toner process comprised of a first heating of a mixture of an aqueous colorant dispersion, an aqueous latex emulsion, and an aqueous wax dispersion in the presence of a coagulant to provide aggregates, adding a base followed by adding an organic sequestering agent, and thereafter accomplishing a second heating, and wherein said first heating is below about the latex polymer glass transition temperature ( $T_g$ ), and said second heating is above about the latex polymer glass transition temperature.

Please substitute the following amended paragraph for the pending paragraph [0002] on page 1:

[0002] Illustrated in copending application 10/603,449, U.S. Publication 20040265727, filed June 25, 2003 on "Toner Processes", the disclosure of which is totally incorporated herein by reference, is a toner process comprised of a first heating of a colorant dispersion, a latex emulsion, and a wax dispersion in the presence of a coagulant containing a metal ion; adding a silicate salt; followed by a second heating.
